

REALSING™ CERTIFICATION DOCUMENTATION

I, _____ do hereby confirm on this date, _____ that with regards to my participation in the recording called _____, by the artist/group named _____, absolutely no vocal tuning or vocal pitch alteration was used in any stage of the recording or mixing of the lead or primary vocals.

Note: The Artist, Producer and Engineer must each sign and return individual forms to be eligible for RealSing Certification, so please organize that prior to paying your fee. If the Artist, Producer or Engineer serve in multiple capacities they will check the appropriate multiple boxes on the submission form. In this case a copy of the recording's credits/notes must accompany the submitted form. If no credits/notes exist please accompany the form with an attachment explaining the multiple roles of the Artist, Producer or Engineer.

Reminder: If individual tracks on your recording utilize Auto-tune as an obvious "novelty" effect, as opposed to pitch modification then the relevant track/s must be listed as an attachment to the return form and an mp3 of the track/s e-mailed to RealSing™. The RealSing Collective will review those tracks and render a final certification decision. Regardless, at least 80% of the recording must be deemed totally free of "novelty" vocal enhancement and 100% free of pitch correction to be eligible for certification. If your entire recording is certified with RealSing then any tracks in that recording are implicitly also certified, including the "novelty" use tracks (which will have already been certified as free of pitch correction). You may indicate the certification number in the description attendant to each track on your site and if you have image download capability you may download the RealSing™

logo (which we will provide as an e mail attachment) for use adjacent to only the certified tracks, not your entire website.

My professional role(s) in this recording was (check one or more):

- Vocalist
- Producer
- Engineer
- Other

Signature
